VOL. XXV, No. 49

WETASKIWIN, ALBERTA, THURSDAY, FEBRUARY 25, 1926

V. C. French, Publisher

TEST WELL TO BE SUNK NEAR MONK ST., EAST SIDE

Superintendent of Edmonton Water Department submits Report. Patients may be Examined. Times is given Tender for Printing. Auditors' Report submitted. Curt Smith makes recommendation. Edmonton Mayor will represent Wetaskiwin.

A regular meeting of the city council was held on Tuesday evening with all members in attendance.

After the adoption of the minutes of the last meeting, D. W. Wark addressed council, and presented a petition, protesting against the burning of straw near their premises. The matter was referred to the City of Police.

C. H. Russell, city solicitor, wrote respecting the closing of Monk street crossing, and opening of Pearce St. crossing in 1917, and enclosing petition from C.P.R., asking that the necessary transfers of this property be made. The mayor and secretary were authorized to sign the application.

The Western Canadian Development League wrote respecting cancellation of the convention at Vancouver, and asking that a delegate from Wetaskiwin be sent. Council is in sympathy with the convention, and Mayor Blatchford of Edmonton will be asked to represent Wetaskiwin.

The Canadian Union of Municipalities wrote for solving municipal problems and asked for membership fee of \$10.00. Letter filed.

A telegram from Montreal, asking about Wetaskiwin's financial position and reply sent, were read. Mr. Fraser's letter in the matter was ratified.

Dr. Laidlaw wrote regarding possible patients for tuberculosis during Dr. Baker's visit to Wetaskiwin. The matter has been attended to.

Curt Smith wrote respecting the tieing of horses in the lane between the hotel and post office, pointing out damage; also condition of cement walk on Railway street in front of hotel, and also requested an answer to his application for water at the farm. The matter is being attended to.

The city of Brantford wrote asking the council of Wetaskiwin to endorse a resolution urging the federal government to enact an insurance act for the unemployed. Received and filed.

Supt. Fox, of the C.P.R., advised council that proposed curtailment of the Hardisty train service had been suspended and trains would continue. Mayor Montgomery reported on the interview held with the C.P.R. officials regarding the train service.

Mr. Henderson & Co., auditors, submitted their report of the audit completed for the year 1925, which was received and filed.

Tenders for the printing of forms for the waterworks and electric light departments were opened as follows: Times, \$24.00 and \$39.50; Free Press, \$30.00 and \$52.00. The tender of The Times was accepted.

Five accounts for health permits will be placed in the hands of the city solicitor for collection.

The following accounts were passed for payment: General, \$266.34; Waterworks, \$51.90; Electric Light, \$292.99; Supplementary, \$51.17.

The finance committee recommended that \$61.93 be written off the tax roll.

H. G. Smith was given a building permit for alterations to his property. Chief of Police Kingzett submitted his report for February, which was received and filed.

The report of Mr. Cunningham, superintendent of the water department at Edmonton, was read. (The full report appears in another column). A letter from the superintendent of the water department at Winnipeg, was also read and filed.

It was decided to sink a test well

RAILWAY OFFICIALS VISIT WETASKIWIN

On Friday last, J. H. Shinnick, inspector of railway operation for the Board of Railway Commissioners, and G. J. Fox, C.P.R. divisional superintendent, were in Wetaskiwin interviewing the citizens on the matter of curtailing the services of the Hardisty train. During the day, Mayor Montgomery, Aldermen Parker and J. E. Fraser, secretary treasurer, representing the city, and Chas. Russell and R. W. Manley, representing the Kiwanis Club, conferred with the officials on the matter, and pointed out the confusion and inconvenience in the event of the service being reduced to a tri-weekly. As the officials were visiting other places affected, and were very non-committal, it is not known what report they will make to the Board of Railway Commissioners respecting the question.

Look at the label on your paper.

FULL REPORT OF EDMONTON WATER SUPERINTENDENT

The following is the complete report of Mr. Cunningham, superintendent of the water department of the city of Edmonton, who recently investigated the water situation in Wetaskiwin:

With reference to my visit to Wetaskiwin on January 27th, and the discussion which took place with the city council, relative to various matters affecting your city water supply. The memorandum of questions which was discussed at that time contained really three pertinent matters.

1.—As to the best method of feeding the Waterworks system?

This was discussed with council, and my opinion is that the existing method of pumping from the ground reservoir into an overhead tank, to the elevated tank in the most acceptable method under present conditions.

2.—As to the elevation of the existing overhead tank?

The existing pressure of a maximum of approximately 70 pounds per square inch, is in my opinion quite a satisfactory pressure, and there would not appear to be any convincing reason why the tank should be lowered to reduce the pressure to 40 pounds.

3.—It would appear to be necessary to consider some means of augmenting the supply of water. While it is stated that the wells from which the supply is at present maintained have not diminished in volume, the consumption of water is increasing. The proposal is to excavate a well either 8 or 10 feet in diameter to a depth of 180 feet, as against drilling smaller wells.

To procure the necessary quantity of water there must be present a water bearing formation of considerable extent and porosity.

The yield of any form of well is a question rather of the flow of the ground water and of the area made tributary by the depression of the water level in a well, than a question of the size or form of construction.

Without some knowledge of the amount of water actually flowing in the ground, no formula will enable one to predict the yield of a well. (Turner in "Public Water Supplies" states that other things being equal, a 2 foot well will yield 15 to 30 per cent more than a 3 inch well). He shows that the effect of size alone is very small, and that therefore we need not expect an increase in the yield of large wells commensurate with increase in size.

However, in the case where the circle of influence is small or where the water is present in large quantities, the increase may be very considerable.

The large well possesses an advantage over the small well in its storage capacity. If the pumping is carried on at a variable rate, it thus acts to increase greatly the real capacity of the well over that of a series of small wells.

In the operation of the pumps there are many advantages in being able to get the entire supply from one well, chief among which is the avoidance of long suction pipes. The large well also permits the use of more economical form of pumping machinery.

To summarize, it may be said that large wells are suited for places where the water can be reached at moderate depths, where the excavation is not difficult, where a single large well will furnish the desired amount, and where the pumps are to be operated but a few hours of the day.

The proposal at Wetaskiwin is to sink a well 16 feet in diameter to a depth of 180 feet. It may be stated that this is an exceptional depth to sink a large well, 10 feet diameter and 100 feet deep being considered about the maximum in practice. The cost of a well increases with increase in diameter more rapidly than does the yield, and a very large diameter such as proposed should be adopted only after most careful consideration.

After a detailed examination of the problem at Wetaskiwin, it appears to me that the first consideration is a determination, as accurately as may be obtained, of the amount of the ground water flowing through the area in question. If as before stated the water is present in large quantities, and the circle of influence is small, the water to be obtained from a well 16 feet in diameter might justify its construction.

It should be remembered, however, that the first thing to be considered is the quantity of water obtained for a given expenditure, and the question of economical operation in conjunction with your existing power equipment, while very desirable, should not take precedence of the most important element, that is, the availability of the necessary amount

OBITUARY

BENNIE BIDERER

The sympathy of the community is extended to Mr. and Mrs. B. J. Biderer in the loss of their little son, Vincent, Benjamin, who was taken from them on Tuesday at the age of three years and two months, after an illness of only a couple of days with croup. The funeral arrangements had not been completed at the time of press.

GEORGE F. REIMER

George Frederick, son of Mr. and Mrs. Reimer, of the Battle River district passed away on Sunday last, at the age of five years and six months. The funeral took place on Wednesday afternoon, the interment being in the Wetaskiwin cemetery.

RUTH E. WAGAR

The angel of death visited Wetaskiwin on Saturday and removed Ruth Elizabeth, the infant daughter of Mr. and Mrs. T. K. Wagar, at the age of two years. The funeral took place on Sunday afternoon, the interment being in the Wetaskiwin cemetery. Rev. V. Swanton had charge of the service.

WILLIAM BROWN

Another popular citizen of Wetaskiwin, in the person of William Brown, passed out of this life on Wednesday morning at the age of sixty years, one month and eight days. He had been formerly engaged in Christopher's Grocery, and was obliged to resign his position some months ago on account of ill health.

Decatur was born in Scotland, and resided for several years at Lethbridge, Sask., prior to coming to Wetaskiwin about ten years ago.

The funeral will take place on Saturday, service being held in the First United Church, Wetaskiwin. Lloyd A. F. & A. M. will have charge of the funeral arrangements. Interment will be in the Wetaskiwin cemetery.

WEDDINGS

LINKLATER & OWEN

On Monday, February 15th, at Owen, Miss Florence E. Owen, formerly of Wetaskiwin, was united in marriage to Mr. Horst James Linklater, of Winnipeg. Mr. and Mrs. Linklater will reside in Winnipeg.

PROGRAM SWEDISH BAPTIST INSTITUTE

The following is the program to be given at the second annual Commencement, to be held in the Swedish Baptist church, Wetaskiwin, on Tuesday, March 2nd, 1926. Chairman—Rev. Ole Larson. 7:30—Congregational Singing. Scripture Reading—Eldar Brundt. Prayer—Helen Johnson, Esther Brandt, Ethel Carlson. Song (The Bible Satisfaction)—Choir. 7:45—Address "Contending for the Faith"—Rev. C. Burnett of Calgary. Song with instrumental music. 8:15—Oration "Bible Study"—Janette Ovre. Vocal Duets—Mrs. Wain and Miss Billesten. 8:30—Oration "Take heed to thyself and the Doctrine"—Raymond Freyling. 8:45—Oration, "I have set before thee an open door"—Ethel Johnson. Swedish Chorus. 9:00—Presentation of Certificates. Rev. Bergh. Response by Evelyn Dahlberg. Class Song. 9:30—Address "Ambassadors for Christ"—Rev. Peterson. Devotional—Rev. Peterson and Rev. P. M. Meyer. Closing Prayer—Emanuel Carlson.

of water for the supply of the city.

If the advice of a competent geologist can be obtained to determine water flow, and test holes prove favorable, the amount of water to be obtained from a large well should be carefully calculated, using all the known data. The actual construction of such a large well is quite a serious undertaking, and the council would be well advised to take all possible steps to prove the project before commencing operations.

It would also suggest that the possibility of obtaining water from drilled wells at a lower water horizon than the existing wells, should be examined.

Yours truly,
W. J. Cunningham,

PROF. OTTEWELL TALKS ON SELF IMPOSED TAXES

"Self Imposed Taxes" was the subject of a very thoughtful and witty address given by Prof. Ottewell of the extension department of the University at the Kiwanis Club luncheon on Tuesday evening. The professor opened his remarks by stating that there should be a complete overhauling of the tax system in this country, as we are paying taxes on the taxes we have already paid. There may be mismanagement and extravagance in the handling of public affairs, but at the same time we have been better served in the past and are being better served today than we deserve.

One of the popular criticisms is that of public education. In 1925, we spent \$110,000,000 in educational efforts from the public funds, collected through the tax collector. In 1924 there were 2,000,000,000 cigarettes, 2,000,000,000 old pounds of tobacco and 750,000 pounds of snuff consumed in Canada. The total cost of this would almost balance the whole educational bill.

In Alberta the government collected about \$11,000,000 and the school boards about \$5,000,000 for education. In the province over 50,000 automobiles are used at an average cost of \$400.00 a year. This expenditure would about equal the provincial budget but the school board demand for education. Can we say we are taxed to death?

The Alberta University is costing the government about \$350,000 a year to carry on all the work, excepting in the laboratory. Last year 3,355,000 gallons of beer were consumed in addition to \$13,109,000 worth of liquors purchased through the vendors' store. In order words over \$5,000,000 were consumed in drink last year. If you consider the illicit liquor sold, it will about balance the school bill in Alberta. Have the time come when any of us can say we are spending too much for education?

The professor then referred to fads which are self-imposed, such as the organ, the piano, talking machine and radio. He had no quarrel with them, but billions of dollars are being spent in that way. Think of the tax collector imposing such a tax!

Then there is negligence, sloppiness and carelessness, through which we throw away capital with both hands. The tariff on agricultural implements is less than 20 per cent, but about 90 per cent of the implements are in the most commodious implements ever constructed—all outdoors—where the depreciation would offset any tariff ever imposed.

Then the indulgence in golf is another means of spending lots of money cheerfully. What would happen if the tax collector endeavored to collect a couple of dollars every time a man went around an 18-hole course?

Governments in their haste and impatience put legislation on the statute books which is almost worthless and unworkable. Next year they amend their work, and the following years keep on changing it.

Prof. Ottewell concluded by referring to the sums spent through ignorance and foolishness. For instance purchasing land which is known by scientists to be useless and trying to raise crops on it, with the result that the savings of a life-time are soon dissipated.

DAIRY ASSOCIATION EFFECTS SAVINGS

During the first ten months of its existence, the Central Alberta Dairy Producers' association has had a turnover of \$250,000, involving some 40,000 transactions, states A. C. Johnston of Olive, president of the association. "The savings effected for the members," says Mr. Johnston, "over and above the prevailing price paid each day for butterfat, amounted to \$23,000 during the ten months."—Western News.

U.F.A. MEETINGS

On Wednesday evening, March 3, the Cherry Grove U.F.A. and U.F.W. A. will meet at the home of Mr. and Mrs. A. J. Rix.

The next meeting of the Lone Ridge local U.F.A. and U.F.W.A. will be held at the Lone Ridge Hall on Thursday evening, March 4th, when an address will be given by Hon. George Healey. Everybody welcome.

COMMISSION ASKED FOR

An amendment to the Alberta Church Union act has been asked for, in behalf of the continuing Presbyterian church, to provide for the appointment to churches on Friday night to play for the Whyte & Orr trophy. The Premier asks a voluntary committee from both parties, instead.

MUN. DIST. OF MONTGOMERY IN BEST FINANCIAL POSITION

Reported at Annual Meeting that all Debts had been paid, and Savings Certificates purchased. School Districts in more satisfactory condition. Grant to be made Exhibition Association. Councillors elected by Acclamation.

The annual meeting of the Municipal District of Montgomery was held on Saturday last, with a good attendance of ratepayers. After the reading and explanation of the financial statement by the secretary treasurer, Capt. G. Baker, Rev. T. T. Jevne submitted the report of the council for

30.52 PER CENT OF PRESBYTERIANS VOTED ANTI-UNION

Toronto, Feb. 22.—Statistical officers of the United Church of Canada have completed their compilations and analysis of the voting by the members of the former Presbyterian church in Canada on the question of uniting with the Methodist and Congregational churches and which union was consummated on June 10, 1925.

An official statement issued Saturday on the basis of these compilations, which include the most accurate returns obtainable, indicate that the percentage of the former Presbyterian church membership which voted out of union was 30.52 or a little less than one-third.

The total number of congregations now in the United Church of Canada is 8,695, of which 3,728 were former Presbyterian self-sustaining or self-receiving churches. The total number of Presbyterian congregations which voted out of union, including eight which voted to remain independent, was 184.

No account is taken of new congregations which have been formed either by unionist or by anti-unionist minorities.

CASTOR YOUTHS WIN DANCES OF \$50.00 EACH

Castor, Alberta, Feb. 22.—Has a high school teacher in Alberta the right to suspend pupils, being students of a high school and over 15 years of age, through continued non-attendance at school due to truancy? His Honor Judge Morrison of the district court, by a recent decision, has given it as his opinion that the school act confers no such right upon a teacher to suspend pupils, being students of a high school and over 15 years of age, through continued non-attendance at school due to truancy?

With regard to the bail insurance, the amount owing to the board has been entirely paid, and all arrears amounting to about \$100.00, now being to the municipality.

After a lengthy discussion, it was recommended that the council levy an assessment of 50c an acre as a grant to the Wetaskiwin Exhibition Association, to be applied on the deficit.

The election of councillors resulted as follows:

Division 1—Lee Bussard, by acclamation.

Division 2—C. A. Johnson, re-elected by acclamation.

Division 5—H. E. Jorgum and T. T. Jevne were nominated, but the former was withdrawn, and Mr. Jevne was re-elected by acclamation.

"DRY" REQUEST IS PRESENTED

Edmonton, Feb. 22.—When the people vote a few months hence in the general elections, let them vote also on the elimination of the beer parlors, asked a deputation from the Alberta Prohibition association, in conference with the government Friday morning.

This was declared to be the most important of the resolutions passed at the annual convention which had to do with action by the government, and was strongly pressed upon Premier Brownlee and his cabinet.

The amendment was asked to give its influence towards securing action by the Dominion government, that will make provincial laws and law enforcement effective.

A. L. Marks, in submitting the request for a plebiscite on the elimination of the sale of beer in licensed premises, said that the time has come at large, but that it is desirable to have the beer parlors discontinued in order that government control might be given a fair trial.

Premier Brownlee questioned whether or public sentiment is ready yet for another vote. He thought that opinion on the question has not crystallized to the point where a plebiscite would be warranted, but he mentioned the fact that the several local opinion votes had given class margins, showing that prohibition sentiment has still to be created in many cases.

CURLERS FAILED TO LIFT TROPHY

Two trials of Wetaskiwin curlers skipped by J. Taylor and J. F. Elliott to Camrose on Friday night to play for the Whyte & Orr trophy. They failed to bring the cup back with them, losing out by one point, but enjoyed a very pleasant evening as guests of the Camrose curlers.

AUCTION SALE

HORSES, CATTLE, MACHINERY, ETC.

The undersigned Auctioneer has received instructions to sell by Public Auction on the S.W. 4-6-24-4, 4 1/2 miles southeast of Palm, 15 miles west and 2 miles south of Wetaskiwin, on.

MONDAY, MARCH 1, 1926

At 12:30 sharp, the following:

HORSES—Team Hay Geldings, 7 and 8 years, weight 2800; Team Grey Geldings, 10 and 11 years, 2400; Team Black Geldings, 12 years, 2800; Team Black mare and gelding, 10 years, 2200; Black Mare, good driver, broke to saddle, 1000; Hay Gelding 8 years, 1500.

CATTLE—10 head of extra good

Milk cows, some fresh, more to

freshen by date of sale; 3 Yearling

Heifers.

POULTRY—75 Chickens.

MACHINERY—1919 Gray Dort

Touring Car; International double

disc, 20 run power HT drill; John

Deere Double Disc; John Deere 14 in.

Walking Plow; Cockshutt 18 in. Walk-

ing Plow; 3 sections Diamond Har-

rows; Massey Harris Disc; Deering

6 foot Blinder; John Deere 5 foot

Mower; Massey Harris Mower; Deering

10 foot Hay Rake; John Deere Steel

Wagon; John Deere 14 in. Grinder;

G.G. double Wagon Box; John Deere

10 inch Grinder; Harrow Cart; 2

Hay Rakes; 2 Cutters; Plank Wagon

Box; Grindstone; Sickle Grinder;

Shoe shearing machine; Stock Pump;

Quantity of Lumber and Brick; 6

Portable Grinders; 100 rods Hog

Wire; 100 rods Sheep Wire.

HAY—3 Stacks Hay.

HARNESS—2 sets Breaching Har-

ness; 2 sets cable harness; set light

Driving harness; Lady's Saddle; 10

Collars.

HOUSEHOLD EFFECTS—Range,

Large Heater; 2 Camp Stoves; Six

Kitchen Chairs; Kitchen Cupboard;

Sideboard; Wollon Phonograph and

large quantity records; Singer Sew-

ing Machine; 4 Beds, Springs and

Mattresses; Washing Machine; 12

Not Right
Off

People who are properly advised, properly placed, and properly looked after when they are placed, can make a living off the land in Canada. Of course, they cannot expect to make a rich living all at once. They must expect to be transformed in a year or two from landless, poorly paid, precariously employed folk, without any capital to speak of, into a sort of equivalent of prosperous proprietors, with every comfort and no troubles to speak of.—Red Deer News.

The Perfect
Tax

Theoretically, the perfect tax would be a tax on inaction. The proper man to tax would be the loafer, not the worker; idle land, not used land; inactive capital, not active capital; lack of enterprise, not enterprise.

Such a tax would not be practical, but it would be a just tax. Our present taxes are based on an opposite theory. We tax thrift, action, capital, enterprise. We levy taxes in proportion to ability to pay, which means that the harder a man works, the more we tax him; the more thrifty he becomes, the more we seek him; the more efficient he grows, the more we shake him down.

If I have my money and buy a house I am taxed; if I waste my money in extravagant living, I am not taxed.

None of our taxes is designed to encourage production by the simple process of discouraging idleness, shiftlessness, inefficiency. The devil himself could not do a sadder job of hobbling the human race.—Hewitts in The Municipal World.

Truth About
Buying

A very careful analysis of the comparative values of a number of lines of goods sold both through stores and by canvassers causes us to say that there is absolutely no question but that women who buy from stores receive more for their money.

Exceedingly plausible sales talks have caused many women to hold the erroneous and costly belief that they can buy more cheaply from the agents than from the retail store.

They are given the impression that goods sold at the door cost less "because a number of profits are wiped out." What they are not told is that the commission paid the canvasser is of necessity much larger than the regular profit of the merchant.

All investigations show, and any woman who will investigate can prove it for herself, that dollar for dollar, the retail store gives the greater value.

Read the advertisements in The Times each week and you will save money, each week.

LOCAL MEMBER
GIVES ADDRESS
IN PARLIAMENT

MR. TOBIN'S SPEECH IN HOUSE
OF COMMONS ON JANUARY
28TH LAST

(Continued from last week)
I am glad to see that our railways are showing increased earnings. In 1921 the Canadian National Railway was referred to as a joke and a jest, but today it is one of the greatest railway systems on the American continent, closely approaching in efficiency and measuring up in every way to the Canadian Pacific railway—probably the greatest system in the world. Is not that something worth mentioning in this house? In 1921 the stock of the Canadian National railways was worthless, but today that road is one of the greatest railway systems on this continent. In the part of the country where I live we have more than a sentimental interest in the Canadian National railway. That part of Alberta north of Red Deer could not exist as it does at the present time were it not for the Canadian National railway. We could not without it have the large number of towns west of Edmonton all along the line. Although we have deficits on the road we must remember the service it is rendering.

I am glad also to note that the Hudson Bay railway will be completed. It is partly constructed now and it should be finished. It will help develop that part of the country, and be a help to the grain trade.

The Peace River country should also have an outlet. At present they have to bring their grain to Edmonton, and when it gets there is just about as far from its natural market as when it left. An outlet should be provided to the Pacific coast. I would also like to see the Lacombe and Northwestern railway completed, and

Here and There

Salmon exports from British Columbia amounted to 1,571,000 cases, the record for the "mountain glissade," was performed at Revelstoke, B.C., on Friday, January 29, before hundreds of visitors to the start of Revelstoke's twelfth winter carnival. "Glissading" consists of flying down rough uneven mountain slides on skis.

For the first time in Canada, a sport known as the "mountain glissade," was performed at Revelstoke, B.C., on Friday, January 29, before hundreds of visitors to the start of Revelstoke's twelfth winter carnival. "Glissading" consists of flying down rough uneven mountain slides on skis.

From August 1, 1925, to January 31, 1926, 3,182,198 bushels, or about one and a half per cent. of the 195,637,112 bushels of grain shipped by the Canadian Pacific Railway went by the all-rail route. About one-eighth, or 30,216,134 bushels travelled through the port of Vancouver and the balance of 85 per cent was shipped via Port William.

Five hundred Montreal school children will give a concert on the concluding night of the triennial conference of the National Council of Education, to be held in Montreal from April 5 to 9. The speaker for the occasion will be Sir Walford Davies, well known authority on national and school music.

Under the auspices of the French Government, the French universities and Hon. Philippe Roy, commissioner-general of Canada in France, a large gathering witnessed the opening of the tenth annual Banff Winter Carnival on February 3. "Queen Gabrielle" regally entered in a fairy ring gorgeously formed by frost crystalline ice, drawn by a team of huskies. Shooting, skiing, skating, hockey and hikes featured the big winter sport tournament.

Pulp and paper exports from Canada during 1925 were valued at \$154,555,951, as compared with \$130,491,469 for the previous year. Newsprint production for 1925 was estimated at 1,516,000 tons, as compared with 1,352,294 tons for 1924. This is twice the newsprint production of 1918.

With glorious weather prevailing, a large gathering witnessed the opening of the tenth annual Banff Winter Carnival on February 3. "Queen Gabrielle" regally entered in a fairy ring gorgeously formed by frost crystalline ice, drawn by a team of huskies. Shooting, skiing, skating, hockey and hikes featured the big winter sport tournament.

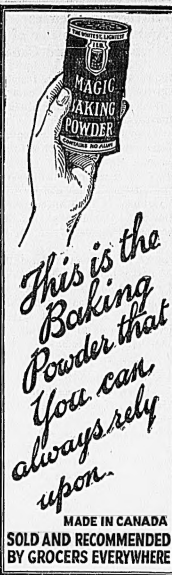

Two more cases of automobiles crashing through gates at the crossings at Chelsea Road, Hull, Quebec, have been reported. On January 6, an automobile bus, laden with passengers, was driven through both gates. The driver explained that his windshield was frozen. The second case occurred February 2 when a car ran past just as the gates were being lowered. Both cars were damaged.

Addressing the members of the Canadian Lumbermen's Association at their eighth annual convention banquet at Montreal recently, R. W. Bentley, K.C., President of the Canadian Pacific Railway, stated that the 1925 income tax would collect from \$42,000,000 to \$45,000,000. Mr. Bentley declared that a reduction of 25 per cent. or \$11,000,000 might be brought about if the government expenses were cut. The Canadian Pacific Railway had reduced its expenses by over double that amount in one year, and the railway company was not as large as the Dominion of Canada.

one of our large railway systems take it over.

I am glad to note that there has been a considerable reduction in expenditure and in taxation, and that there are to be further reductions. I believe in reductions in expenditure, but sometimes reductions are not economic; sometimes if carried too far they result in loss. The country demands services. I am going to ask for greater expenditure in my constituency of Wetaskiwin. We need more rural mail routes there, and I hope the government will be able to deal in a fairly generous manner with us in that respect.

Reference has been made to a comprehensive immigration plan. I agree with those who say we should keep on the land and those who are already there. I know this has been said before, but sometimes repetition is good because it gets into the minds of the people what we are getting at. I believe that the Liberal policy as outlined in the speech from the throne is the best way of accomplishing what we desire in the matter of immigration. The Liberal policy of lower taxation and a lower tariff will do more to encourage people to stay on the land than anything else that can be mentioned at the present time. Efforts should also be made to try and repatriate Canadians who have settled in other countries. Of course, it is difficult to bring back people who have established themselves in other lands, but some effort should be made along that line. I hope that if immigrants are brought into western Canada or into any part of Canada where there is agricultural land, they will be real agriculturists, people who have followed agriculture and have the agricultural bent. If you

bring on the land people who are used to getting pay cheques, they will not make good on the farms. If we are going to bring people from other countries let us know that they are real agriculturists who understand farming, who believe in farming and who love the land. We have around the riding of Wetaskiwin a cosmopolitan people. We have a great many from Nova Scotia and other provinces, as well as many from the United States and other parts of the world. We have immigrants from Norway, Sweden, from Germany, from Ukraine, we have French Canadians, and all are making a success in that part of the country. Those who are agriculturists, who came from foreign countries where they lived a rural life, will be satisfied if they find that the land in Canada will produce more than the land they left, and they will stay in the country. But the man who knows nothing about agriculture will fail. The farmers here may say "Why should you bring agriculturists to this country to compete with us?" But if an agriculturist comes here he is working in Canada and he is competing with other countries. Let them come here and work on the land rather than work on the soil in some foreign country. We have seen tenants in different parts of my riding where people who were agriculturists and

Walked the Floor
Heart and Nerves
Were So Bad

Mr. Thomas Cox, R. R. No. 1, Galtroy, Ont., writes:—"I was so bad with my heart and nerves I would have to get up out of bed during the night and walk the floor, as I would take such bad smothering spells, with my heart, I would think that sometimes I would die before I got over them."

After taking two boxes of

Milburn's
Heart and Nerve
Pills

I got better and am now as well and as hearty as ever I was.

Now, I would recommend Milburn's Heart and Nerve Pills to all who are bothered in any way with their heart or nerves, as I cannot say too much in their praise."

Milburn's Heart and Nerve Pills have been on the market for the past 82 years; see that you get them when you ask for them.

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

**MINARD'S
'KING OF PAIN'
LINIMENT**

took an interest in the work made a success, but those who were not agriculturists were not successful and did not stay with it. All the farmer asks on the land is an even chance. He asks for no tariff wall to be put up for him, and asks no drawbacks. He says: "I will compete with the world." That is the kind of agriculturists we want. We want the man who will say "I can raise grain and I can raise grain and I can raise grain against me. Do not overtax me; give us a chance in the world's market and we will succeed."

One of the hindrances to immigration—and we heard it today in this house—is the speeches made by public men in high places, telling the world that the people are leaving Canada, that industries are going to pieces and that all is wrong with this country. That is one of the greatest drawbacks to immigration. When men like the right hon. leader of the opposition make statements in this house they go to all parts of the world and when the man in a foreign land reads the statement that the people are leaving our country and the factories are closing down, how can you expect them to immigrate to Canada? I am glad to mention that there is a reference to rural credits in the speech from the throne. I believe something can be done in this line which will be of real assistance to the agriculturist. An agriculturist cannot start without money. When he goes to the bank and asks for credit, they ask him "How much have you got? What are your assets?" When he tells them he has none they refuse him credit and he cannot make a commencement. If a man falls one year the bank will not carry him a second year. I say today the farmers of western Canada—in fact in any other part of Canada—must have a longer term financial system than the people in any other calling. The hon. member for South Winnipeg (Mr. Rogers) in his speech was rather inclined to throw cold water on rural credits. He did not just say so, but he pointed out the things that happened in Saskatchewan and Alberta and stated that if the Conservative party had been in power in these provinces such things could not possibly

have happened. I do not think the hon. gentleman quite knows the history of the Conservative party in Alberta. They had a fair representation in the Alberta legislature in 1905, but their numbers diminished year by year until in 1921 there was only one Conservative, and he ran and was elected as an independent. I say that the Progressives ought to be careful in that province as well as here, because the Conservatives will take advantage of any division that may exist. I advise hon. members to be careful and not be led away by any offer made to them by hon. gentlemen in the right. I have heard Progressives say that in some cases a competitive business will come along and give you something cheap in order to put the other fellow out of business. In 1921 the Conservatives supported the Progressives in Alberta, largely because they wanted

Man Sleep Like Log,
Eats Anything

"After taking Adlerika I can eat anything and sleep like a log. I had gas on the stomach and couldn't keep food down any sleep." (signed) R. C. Miller. ONE spoonful Adlerika removes GAS and often brings surprising relief to the stomach. Stops that full, bloated feeling. Often brings out old waste matter you never thought was in your system. Excellent for chronic constipation. Northern Drug Company.

Whose Advertising Bills Do
YOU Pay, Mr. Merchant?

By Lee Fleming

THE STORE THAT DOESN'T ADVERTISE PAYS THE ADVERTISING
BILL FOR THE ONE THAT DOES.

Every merchant in business pays for advertising, whether he uses it or not. If a competitor's advertising takes any business away from him, the profit he would have made on the lost sale is what his competitor's advertising cost him.

You have, perhaps, wondered how some stores can afford to spend such enormous sums for advertising. That is easy to fathom. Their competitor, who does not advertise and whose business they take, pays for their advertising.

Say the Jones family is a customer of your store. They have \$60, which they intend to spend with you. They read the advertisement of your competitor and are induced to spend their \$60 with him instead of spending it with you. The store makes 20 per cent, or \$12, on the sale. They deduct, we will say, the \$1 advertising cost and have \$11 profit left. The advertising has cost them nothing, they got back its cost and had \$11 profit they would not have had only for their advertising.

Who paid for this advertising?

Did the advertiser pay? No. He got the cost back, and profit besides.

Did the purchaser pay? No. He paid only the regular price.

Then who did pay?

The store that did not advertise paid for his competitor's advertising. He not only paid for the other fellow's advertising, but he paid out of his cash drawer the profit his competitor made on the sale. The store that does not advertise pays the advertising bill for the one that does. He pays in loss of sales, profits and increased costs.

The store that loses business through not advertising has such high overhead and unit sale cost that it cannot possibly sell goods as cheaply as the store that increases its sales and reduces its cost with advertising.

MRS. PARLBY TO DROP BILL FOR MARITAL RIGHTS

Announcement was made in the legislature Friday afternoon by Hon. Irene Parlby, minister without portfolio, who introduced the measure last session, that the Community Properties Act, defining the marital property rights of man and wife, would be dropped by the government.

In its place the government will appoint a special committee to investigate and make recommendations up on the question of property rights involving women, upon which the legislation may be subsequently based.

Mrs. Parlby admitted a great deal of discussion and criticism had been waged around the Community Property Act, during the last few months, and for this reason she felt that the proposed measure had served a useful purpose.

NEW ELKS LODGE

The Kilham Elks Lodge, No. 128, organized by A. R. Hedard, was instituted Friday night by the Camrose degree team, assisted by visiting Elks from Wetaskiwin, Edmonton and Red Deer. It is very regrettable that, owing to the fact that a blizzard was in progress, many of the rural candidates were unable to attend. But despite this fact, some 32 candidates were initiated into the order. The next initiation will take place on Thursday, February 25, when some fifty candidates will be initiated.

FIVE YEARS IN PEN FOR PAIR WHO TOOK \$147 AT STATION

Red Deer, Feb. 15.—At the spring assizes of the supreme court, Fred Wilson, alias Fred Smith, and Sam Lewick were sentenced to five years in the Prince Albert penitentiary by Mr. Justice Walsh. They were found guilty of stealing a revolver from a Chinese restaurant proprietor and breaking into the Canadian Pacific station at Lacombe and rifling the cash register of \$145.75 on December 28th.

HEATED SHOTGUN IN STOVE; DISCHARGED

Vegreville, Feb. 15.—An elderly Ruthenian farmer, Steve Simonovich, at Kuleland, near here, purchased an old-time shotgun at a sale, and, finding it did not work, placed it in the stove to release the screws. No sooner had he done so and turned away than the gun went off and shot him. He was able to scramble upstairs and throw himself on a bed, but an artery had been severed and he bled to death before aid could reach him.

COMPULSORY HALF HOLIDAY

Whether the provincial government shall be requested to make effective a compulsory half holiday in June, July and August in stores throughout the province, is the question Alberta retailers will shortly be asked to settle. The matter was discussed at Wednesday morning's session of the annual convention of the Retail Merchants' association at Edmonton, the incoming executive finally being instructed to send questionnaires to retailers throughout the province, asking that an opinion be expressed.

SHELL KILLED MAN ON BATTLE FIELD

The casualties of the war are not yet at an end! A French farmer named Roy who lived not far from Amiens wished to tether his cow in a clover field. He drove a stake into the ground for that purpose; the end of the stake struck the head of an unexploded German shell that was buried several feet below the surface of the ground. The "bud" immediately blew up, and Roy was killed.

TOWN TOPICS

W. H. Pirhance left for Coronation this week, where he will visit his mother for a few days.

The annual bazaar and tea under the auspices of the W.C.T.U. will be held on Saturday, March 27.

Rev. A. L. Elliott made a trip to Wood River on Monday on business connected with the United church.

The regular monthly meeting of the Hospital Aid Society will be held in the nurses' sitting room on Tuesday, March 2nd, at 4 p.m.

Mr. and Mrs. C. B. Cummings returned from their trip to the coast cities on Thursday last, and report having had a splendid outing.

Miss Lucas, nurse, of the Department of Indian Affairs, Regina, arrived in the district a few days ago to visit relatives and friends.

The regular meeting of the Ladies' Aid will be held in the Sunday school rooms of the United church on Wednesday afternoon, March 4th, at 3:30.

A mixed bonspiel is the big event in sporting circles in the city this week. There are twenty-three risks in competition and double draws are being played nightly.

Robert White, of Edmonton, grand organizer of Loyd Orange Lodges for Alberta, will address a public meeting in the U.F.A. hall, Wetaskiwin, on Friday evening, February 26.

The Beloit Basketball team played a game at Millet on Tuesday evening, when they were defeated by the score of 26-25. A dance was held in Pilon's hall after the game.

The regular meeting of the I.O.E.F. will be held at the home of Mrs. P. A. Miquelon at eight o'clock on Tuesday, March 2. A full attendance is requested.

It is expected that Mr. and Mrs. J. S. Orr, who have been on a trip to the central states, will arrive home early in March. They went as far south as Texas.

Workmen are excavating under the Smith Variety Store, thereby enlarging his stock room preparatory to carrying the brickwork commenced last fall to the front of the property.

The Willing Workers of St. Andrews' Presbyterian church will hold their first quarterly tea at the home of Mrs. J. C. McKay on Thursday, March 25, from 3 to 6 p.m.

L. T. Miquelon sold his farm, north of the city a few days ago to J. S. McCullum, of Edmonton, who takes immediate possession. Mr. Miquelon will not move off the land, however, until possibly next summer.

Mrs. A. S. Craig returned home from her visit with Edmonton relatives on Monday. She remained longer than at first intended owing to the illness and death of a young grandchild.

Joe Mullen, who was employed in the office of a lumber company at Grande Prairie, returned home a few days ago. He reports that owing to mild weather and lack of snow, conditions in the camps are very quiet.

Ed. Mason hauled another load of green lumber from Snell's mill last week which contained over 7000 feet. The week before he hauled 7972 feet of green lumber from the same mill to his home one mile east the city, which constituted a record.

Nestor Begun and Frank Abonsafy returned the end of the week from attending the convention of the Retail Merchants association of Alberta, and report having had good business sessions, as well as a general good time.

Mrs. J. Johnson sold disposed of her property in the city a few days ago to Mr. and Mrs. John Anderson, who recently arrived from Sweden. The new owners will continue to conduct a boarding house. The deal was made through the office of the Johnson Agencies.

Among those who went to Calgary on Monday to attend the Ramely class for students of central Alberta, which is being conducted from Tuesday to Friday inclusive, were Messrs Austin Rix, Fred Dietus, Stanley E. Thirsk, Ted Hiesto, Victor DeStor and Gas. Krause, of this district.

P. W. Strand arrived home this week after spending a couple of months with friends in Wisconsin and Minnesota. It is about twenty-five years since Mr. Strand settled in this district and needless to say he saw many changes since his residence in the U.S. He says nearly everybody is talking Alberta, and he expects a very large immigration to come north just as soon as they can sell their property.

ALBERTA CERTIFICATES POPULAR INVESTMENT

Alberta provincial savings certificates were more popular in 1925 than ever before. The total invested by the saving public during the year was \$2,127,461.4, compared with the previous record of \$1,168,740 in 1923. The grand total invested now in savings certificates is \$7,663,770.80. The investors are chiefly farmers and wage-earners.

Saskatchewan Premier Appointed Minister of Railways and Canals

Ottawa, Feb. 22.—Charles Dunning, premier of Saskatchewan, is entering the King government as minister of railways and canals.

Mr. Dunning succeeds George P. Graham, who has resigned his portfolio.

Mr. Graham will continue however, in the government as minister without portfolio. Official announcement to this effect was made late Saturday afternoon by Premier W. L. Mackenzie King.

The premier further declared that P. N. Darke, Liberal for Regina City, had resigned to make way for Mr. Dunning. Nomination day has been fixed for March 16, stated Premier King, with March 23 as the date of the by-election in Regina.

UNITED CHURCH NOTES

The Sacrament of the Lord's Supper will be observed at the Morning service.

A Preparatory service will be held on Friday evening at 8 o'clock. New members will be received at this service either by certificate or on profession of faith.

The Session will meet on Friday at 7:30 p.m.

CARD OF THANKS

I wish through the columns of The Times to express my thanks to the ratepayers of Division 4 of the Municipality of Bigstone, 459, for their support and for having elected me as their councillor during the past six years. I tried to the best of my ability to give one and all a square deal, regardless of friends and I hope that Division 4 will be as well if not better satisfied with their new member in office. And to the remaining Councillors and secretary, I wish to extend my thanks for the courtesy shown me while on the council of the above named district.

Yours sincerely,
Geo. Westendorf.

SERIOUS ACCIDENT

George Starkey met with a serious accident Wednesday afternoon when his thumb was caught in the well drilling rig. It was badly jammed, and it is possible that it will have to be severed.

BUSINESS LOCALS

***See Syd Chaplin, star of "Charley's Aunt" in his latest success "The Man on the Box" at the Angus on Thursday and Friday, Saturday, Mar. 4, 5, 6. Matinee Saturday at 2:30.

LACOMBE WINS DRIARD SHIELD PERMANENTLY

Ponoka, Feb. 20.—Lacombe held Ponoka to a 2-2 draw here last night in the final playoff game of the Big Four league and as a result they win the league championship, they having won the first playoff game at Lacombe by a 3-2 score. This gives them permanent possession of the Driard shield, which they have won now for three successive years.

It was snowing heavily at the commencement of the game and it was decided that 4 periods of 15 minutes each would be played. During the last two frames the snowfall had abated considerably and the play was accordingly much faster.

Ponoka opened the scoring in the first period, Clark talking on a pass from E. Stephens. The territorial play was fairly even although it was impossible to stickhandle on account of the snow on the ice, resulting in much battling of the puck.

There was no scoring in the second period, although the home team had the best of the play. Both goaltenders made some remarkable saves. Lacombe tied things up in the third, however, in nine minutes when Buelles scored unassisted. After this Ponoka swarmed all around the Lacombe goal but were unable to score, the visitors playing fine defensive hockey.

With four minutes to go Calkins registered another for Lacombe. Ponoka kept trying until the last and with 30 seconds to go Harry Sayers scored, making the final score 2-2.

It was a good, clean game. Lacombe scored four minor penalties and Ponoka one from Referee J. W. Somers, of Wetaskiwin, who handed the two playoff games.

Alberta Wins Appeal Before Privy Council

London, Feb. 22.—The appeal of the attorney general of Alberta to the privy council in the case of the attorney general of Alberta versus Cook, has succeeded and judgment was given in favor of the Alberta government by the judicial committee of the privy council. No order was made, however, concerning the costs in the case.

The action known as Alberta vs. Cook was brought by a wife against her husband for divorce in the supreme court of Alberta. One of the questions at issue was as to the domicile of the wife, and another was as to the Dominion parliament alone having jurisdiction in the divorce case, not the province of Alberta.

The judgment declares that the contention that a wife who is judicially separated from her husband is given the choice of a new domicile is contrary to the general principle on which the unity of the domicile of a married pair depends. The statute was not framed with that intention, their lordships say, and does not affect that purpose.

POLICE COURT

On the 20th inst., Adam Kaiser, Sr. was arrested by Sgt. Broadbent on a charge of selling liquor to Treaty Indians. He was brought before R. M. Angus, J.P., and Indian Agent Askey at Wetaskiwin, the same day and pleaded guilty to the charge. He was fined the sum of \$300.00 and costs.

Ed. Rattenlake and Ed. Baptiste, both Treaty Indians were each given three months suspended sentence on a charge of intoxication on the Hobsonia reserve, to which charge they pleaded guilty.

DEFYING KING FROST AT VICTORIA

Taking a dip in the Sea Water Pool at the Crystal Gardens.

son, reveals more daring flowers. The yellow jasmine is covered with bloom, violets stand out boldly in sunny nooks, hyacinths and daffodils are heavy with buds, while nasturtium seeds have dared to germinate and put out leaves as if in challenge to the Frost King.

A new and fascinating feature of the capital city is the Crystal gardens. Situated just beyond the Empress hotel, they leave nothing to be desired in the way of winter attractions. The glass roof covers a swimming pool one hundred and fifty feet in length with a graduated depth from three to ten feet. The pool fills and drains constantly, sea water being pumped in and kept at an agreeable temperature.

Clear skies, bracing sea air, green lawns and spring blossoms, may all be found there, in mid January. Leaving the prairie grain fields, where next spring's wheat nestles warm beneath a thick blanket of snow, crossing the mountains whose passes are topped by snow buried peaks, here spring in all its wealth of verdure greets the traveller. There is a charm about Victoria harbour, not shared by many. For where landing places generally are unsightly, and a distance from the beauties of the city, the docks of Victoria are a part of its attractions. Very fine is the approach. The short way to the stately old Empress hotel is like the carriage drive to an English castle. On the right are the green lawns fronting Parliament buildings, perhaps the finest in Canada. The rose garden that breaks the even green sward, is even now giving a good account of itself, for summer's roses reveal a pale beauty as if not quite sure whether to burst at once into blossom.

A glimpse of many Victoria gardens at this season, reveals more daring flowers. PA'S SON-IN-LAW

**Does Dyspepsia Or Indigestion**

Cause You Distress After Every Meal?

The sufferer from dyspepsia or indigestion who has to pick and choose his food is the most miserable of all mankind. Even the little he does eat causes such torture, and is digested so imperfectly that it does him little good.

What the dyspeptic needs is not artificial digestants, but something that will put the stomach right so that it will manufacture its own digestive ferments.

Will Do This For You

WHEAT SELLING BODY IS GIVEN GOOD SEND-OFF

St. Paul, Minn., Feb. 20.—The International Cooperative Wheat Pool was organized on a permanent basis here yesterday. The action was taken at the end of a three-day conference of wheat pool representatives from the United States, Canada and Australia. Headquarters of the permanent organization will be in connection with the central selling agency at Winnipeg.

Further organization work was left in the hands of a committee, whose members are G. W. Robertson, Saskatchewan wheat pool; S. J. Farmer, central selling agency; C. H. Burdell, Manitoba wheat pool; E. R. Downie, Kansas wheat pool; John Manley, Oklahoma wheat pool, and A. J. Scott, North Dakota wheat pool. Mr. Burdell is chairman and Mr. Robertson, secretary of the organization committee.

Working plans of the international pool were not announced. It is expected however, that there will be a central clearing house for information which will be given to the various selling organizations of the regional wheat pools.

Members of the wheat pools in the United States met later and decided to hold semi-annual meetings of their associations. A resolution was adopted opposing any legislation dealing with surplus crops "which does not give the farmers and their marketing organizations as full control over the instrument created as was given the banks over finance in the passage of the federal reserve system."

LACOMBE AND NORTHWESTERN ENDS IN HOLE

That surveys were not made last year before the extension of the Lacombe and Northwestern railway were asked for, and that as a result the termination of that line was found to be in a valley which was totally unsuitable, was admitted by Hon. Vernon W. Smith in the house on Thursday when he brought down another act giving the government permission to build an additional two and four-tenths miles to the line in order to carry it to a desirable location. It is estimated that the cost will be \$25,000 per mile, but the line will then terminate on higher ground and in a better location. The bill also provides for operating losses of the line, which are expected to be considerable.

Hon. C. R. Mitchell, whose question brought out the fact that the engineering department did not know when last year's appropriation was made that the location was unsuitable, asked the government why a still further addition was not made to give facilities to the country still further on, and was informed by Hon. J. E. Brownlee that the government is already considering representations made from the district affected, and that before the session was over further legislation might be asked for.

RECORD CATTLE TRAIN ON ITS WAY TO OCEAN

Winnipeg, Feb. 22.—All western Canadian export cattle records went by the board last night, when a special cattle train, consisting of 54 cars, pulled out of the Union station with 800 head of beef animals and 1,000 hogs on board, all destined for old country markets.

The shipment, which was the property of the Livestock Producers of Canada, was seen off by practically every cattleman of note in the city and district. Most of the animals had been fed on the feed lots of the company at Edmonton, but quite a number of the hogs had been purchased in Winnipeg by S. LeVeck of Toronto, a representative of the company.

In an interview just before leaving for St. Paul, by the afternoon train, Mr. LeVeck, who is the pioneer cattleman of eastern Canada, said that this was by far the largest shipment of live hogs to the old country from western Canada, that had taken place in the last 20 years.

"The whole shipment on this special train," said he, "is a record so far as the west is concerned, and clearly shows what may be expected in the future. The west is certainly alive with regard to the cattle market of the old country and I look for great expansion in the future."

is just as cheap as poor tea. A pound goes so much further because it is richer in essential oils.

The essential oils produce the flavor.

To be sure, always ask for

to create a condition whereby they, the Conservatives, could come back. But under present conditions they say: "Now that our opponents are divided into Liberals and Progressives we will put men into the field, and we may have a chance." They were not in the field in 1921, but now they are acting on the principle of "divide and conquer."

I understand there is going to be a tariff advisory board. I have been promised in the speech. There should be ample scope for a board of this kind to function for the benefit and general advantage of the Dominion. The major part of the tariff burden is borne by the agriculturist, and selecting the personnel of the board this should be significantly kept in mind. I heard the hon. member for South Toronto (Mr. Geary) telling us to keep things dear. I wonder how hon. gentlemen from Toronto can get up in this house and make such statements. We understand he wants things to be dear, but there are very few in this Dominion, surely, who want that.

Mr. McMillan: Would the hon. member like to see bread dear? He does not answer.

Mr. Tobin: Some other hon. member kindly answered it for me.

Mr. McMillan: No answer was given.

Mr. Tobin: I was going to take up the question of the automobile and the duty paid on automobiles. They talk about cheap automobiles, but when I undertook to go into the question of facts and statistics the results seemed so appalling against the consuming public that I did not carry the matter to its logical conclusion. I am taking a general view of the automobile question, so that others on the basis of what I say, may put the matter before the house in a more detailed way if I do not do so myself.

I was trying to find out how much the people paid in duty, but the figures were so astounding that I did not

**Treat Colds Externally**

For sore throat, bronchitis or deep chest colds, rub Vicks VapoRub briskly over throat and chest and cover with warm flannel.

Vicks acts in two ways—both direct: absorbed into a liniment and inhaled as a vapor, a quick relief for the cold troubles of all the family.

DEATH TOLL IN UTAH SNOWSLIDE

Bingham, Utah, Feb. 20.—Thirty-five known dead with an equal number of persons missing, was the toll early today of the avalanche that overwhelmed the Highland Boy mining camp in Sap Gulch, near here, on Wednesday.

Officials directing the search of the scrambled ruins of a score of buildings, one a three storey frame housing house, housing fifty persons, expressed the belief that in the neighborhood of 70 lives had been lost.

go into them as far as I might have. I found that 54,000 cars were exported, leaving 107,386 cars for local consumption this year. This is not an absolutely accurate statement; it is simply a general view of the matter and fairly accurate. I took it in this way: Supposing these cars sold for \$1,000 each—although that is too low; the figure would be nearer to \$1,500—and supposing for simplicity the number of cars was 100,000 instead of 107,386. That would make a selling price of \$100,000,000. The duty is 35 per cent, but let us call it 30 per cent because luxury and sales tax enter into the question. 30 per cent of \$100,000,000 is \$30,000,000; therefore it cost the people \$30,000,000 for duty, let us say, because while they do not actually pay that as duty, the price is raised by the amount of the duty. Some hon. members say: Why should they not pay these cars at home? Look at the employment that is given to Canadian workmen. I found out that counting all the laborers, clerks and stenographers, there were some 9,000 employees engaged in this industry, according to the 1924 year book. I think I will stop right there, because this is a general statement. If it costs \$30,000,000 to keep 9,000 people employed, hon. members can figure on from that and see where it will lead. If you go to the United States you can buy a \$2,000 car for \$150 less than you can buy it here, and a \$4,000 car for \$1,500 less than you can buy it here. Today the car is a utility; the people require cars, and I ask hon. members why they should have to pay such tremendous duties when Canadian manufacturers are selling 54,000 cars abroad annually? If they can sell abroad, why can they not sell at home without such a huge duty? I think an hon. gentleman who spoke said that money was lost on their export. If they lose on the export, they charge the home consumer enough to enable them to sell to other countries at a loss and we have to pay for the benefit of others.

I am glad to see the government has come down with a sound policy of promoting outside markets. The more bidders we have for any commodity we raise in this country, the better. That is the Liberal policy as opposed to the word "retaliation"—a word that has been used frequently in the house in the course of this debate. Retaliation means that someone else must take the first step. When they take a brick off, you take a brick off; when they put a brick on, you put a brick on. In such a policy we do not require a tariff board; Washington will set our pace for us; retaliate—do what they do. I wonder whether these hon. gentlemen would take off all the bricks on farm implements which the United States allow duty free into their country. But they do not wish to talk about these things; they want to forget about them. "Home markets" is the slogan of the Conservative party, but a country can have home markets only in proportion to its population. In regard to home markets, let me tell a story that has been told in this house before by the former member for Red Deer, Mr. Michael Clark. Probably I will spoil it in the telling, but this is about it. He said that this question of home markets put him in mind of an eagle sitting on a stump. Times were hard, but she spied a lizard down below and hopping down, bit the tail off the lizard and ate it. She went back to the stump and with this nourishment laid an egg. Then the lizard came along and ate the egg and grew its tail, again the eagle went down and bit the tail off the lizard, and so on. Mr. Clark said: "This is home markets. You cannot get rich on that sort of thing, and that is what the Conservative party wants to have."

CHARACTER AND CONSEQUENCE

The final test of all human institutions, of education, of governmental systems, of religion, of itself, is what they do for, feeling, emotion, sentiment—in a word, what they do for human disposition and character. Does a man find his pleasures in the things he ought to do? Does he face the world with joy and confidence and get real happiness out of the fundamental things of life? Does he see the good side of others, of life and things in general, or is his view confined mainly to the bad side? It is an ancient truth, of course, that this world is a tragedy to those who weep, a comedy to those who laugh. The same thing is to be neither a gloomy weeper nor a lighthearted, heartless laughter, but to see the world as it is, with its sunlight and shadow, its joys and its sorrows—to see it with steady, hopeful eyes, as cheerfully as possible, determined to do our best to make things better. No life is complete that is not devoted to something above and beyond the individual. There is no truth more fundamental than that the life which is devoted to selfishness is a life perverted and destined to have no true happiness. There is nothing new in these thoughts which The Philosopher has written down. Those who in restless impatience turn away from serious thought may scorn the foregoing sentences as "preaching." But restless impatient dislike of serious thought and unwillingness to discipline oneself bring their own penalties. This is a world of causes and effects. This is a life in which the things we do have their own consequences.—Western Home Monthly.

MILLET U.F.W. A.

Mrs. Walter Wood presided over the February meeting, which was held in the community hall.

The U.F.W.A. library has arrived, and is being taken care of by Mrs. Winter.

Two delegates to the political convention, to be held in Wetaskiwin on March 11, were chosen, Mrs. T. Hovos and Mrs. Lloyd Rapert, with Mrs. W. L. Gray and Mrs. Carney as alternates.

Mrs. Ross, convener of education, gave a very helpful talk on "Co-operation in the community for some time, left on Tuesday for Spokane."

Mrs. Brissard is home again, following her recent illness and operation in the Wetaskiwin hospital.

In the curling game between Leduc and Millet on Saturday evening, the visitors were victors by six points.

Mr. F. D. Shanks, of Edmonton was the guest of Mr. Graham on Saturday.

The Ladies' Aid of the United church will hold their March meeting at the home of Mrs. Graham.

Dr. Plant and Mrs. Wright went to Edmonton on Friday when Mr. Wright underwent an operation at the Royal Alexandra hospital.

The curling game on Friday evening between Wetaskiwin and Millet, resulted in favor of the home rink by two points.

Current Events, many and varied, formed answers to the roll call at the U.F.W.A. meeting on Wednesday afternoon last, when the organization met in the community hall.

A moving picture is being brought from Edmonton by the Ladies' Aid of the United church, to be shown in Pinyon's hall on Friday evening, March 12. Particulars later.

Mr. F. Facey, manager of the Millet electric light plant, has installed another unit in his plant. This addition to an already good plant places Millet in the first rank as a well lighted town.

Mr. C. A. Palmer went to Edmonton on Friday to spend a few days with his daughters, Mrs. A. Johnson and Mrs. Robatta. Mrs. Johnson is just recovering from a severe illness and operation.

Mrs. J. P. Hall was hostess at a delightful tea given by her on the anniversary of her wedding day, Wednesday last, at the home of Mrs. H. Brinker. Those present were Misses Mitchell, Plant, English, H. Brinker, Parker, C. Brinker and Graham.

About thirty friends of W. L. Gray surprised him at his home on Saturday evening, his birthday being the occasion. The evening was spent at cards and a delicious supper was served. Crowning the occasion, Mr. McManus in appropriate words presented the congratulations of all in the form of a beautiful pencil. Mr. Gray, though surprised, made a very suitable reply.

A smart capture was made by Chief of Police King at Wetaskiwin, of two youths named Walter and Charles Lowe, who robbed a Chinese store at Millet about 4:30 in the morning of February 17. The offenders were taken before Magistrate Young and were on their way to serve three months at Port Saskatchewan jail within 14 hours after the robbery.

White stains on furniture may be taken off by applying oil of wintergreen twice or three times. Mix salt or water with gasoline cleaning clothes. It will prevent a stain left by the gasoline.

Stains may be removed from ivory by washing it in soap and water, then soak it in the sun for a few hours every day of a week.

Apple peellings boiled with one-third as much sugar as peellings gives a nice mild flavor to the syrup for hot cakes.

A few apples packed around a fruit cake improves the flavor.

A haw Scotsman was visiting Niagara Falls in the company of a Canadian friend. As they watched the great rush of water, the latter said: "There's a story that if you throw a penny into the falls, it will bring you luck." "Is that so?" inquired the Scot. He considered a moment and then asked hopefully: "Has 'ya' got a bit o' string?"

MILLET LOCAL NEWS

Mr. Ingles and G. Ingles were Edmonton visitors on Tuesday.

H. C. Cooke, of Wetaskiwin, was a visitor in Millet on Friday.

W. L. Gray, M. Strand and Mr. Hodge were Monday visitors to Leduc.

Pat Mullen sold a load of cattle to a Lacombe buyer, these being shipped on Monday.

Mrs. Arthur Kellert, who has been visiting in the community for some time, left on Tuesday for Spokane.

Mrs. Brissard is home again, following her recent illness and operation in the Wetaskiwin hospital.

In the curling game between Leduc and Millet on Saturday evening, the visitors were victors by six points.

Mr. F. D. Shanks, of Edmonton was the guest of Mr. Graham on Saturday.

HILLSIDE

Mrs. M. J. Hovos, who has been visiting her sons, Horace and Nathan at Toronto, was seized with a stroke. She is progressing as favorably as possible under the circumstances.

Mr. R. Siebert is in the Wetaskiwin hospital suffering from a severe attack of pleurisy.

Mr. L. Keen was successfully operated on for appendicitis in the Wetaskiwin hospital recently.

A Progressive Whist party and picnic will be held on Friday evening, February 26. This is being held by the Social Club.

There is quite an epidemic of colds at present.

Miss Margaret Young is laid up with influenza.

Miss Lella Marr has returned to Wetaskiwin to resume her studies at the high school.

E. E. Sparks, and Mr. Enzanner, of Wetaskiwin and Alexandra, M.L.A.'s, addressed a fair sized audience at the school on Friday. Both speakers were well received.

Going to Mr. T. Hovos, of the negative side of the debate, being unable to be present, the debate, "Resolved that the strictly dairy cows are more profitable than dual purpose," was somewhat spilt.

However, it is hoped that this interesting subject will be battled over again on both sides claimed that only the surface of the arguments pronounced with great emphasis had been scratched. The affirmative won however. Mr. C. E. Scharf acted as the chairman and the M.L.A.'s as judges.

A social half hour was spent after lunch which was enjoyed by all. This affair was organized under U.F.A. auspices.

We extend our sympathy to Mr. and Mrs. C. L. March in the loss of their nephew, Mr. O. Tiffany, of Meeting Creek.

SOME MIDWINTER REFLECTIONS

One of the things not to be forgotten in midwinter in this country is that people in the countries where there are tropical fruits to be picked all the year round suffer from various troubles which, if not causing their actual disease, keep them in the hospital between health and illness. As for the fruit of those countries, as a matter of fact, it has more looks than taste; apples of full flavor grow only where snow comes.

The people in those countries are lacking in energy and vitality. Countries which have hot climates are less progressive than countries with temperate climates and countries whose climates are not without severities of cold weather. Progress is possible only where people have the surplus energy, the self reliance and the buoyancy of spirit which are produced only by good health. There is an old saying of the people of Switzerland: "Where snow comes there is freedom." Consider the case of Mexico, a country which is truly a great treasure house of natural resources. But though Mexico is rich, Mexicans are poor and backward, primarily because the general health of the mass of the people is low; the people are a very great deal of malaria, of hookworm trouble and of other debilitating conditions. Civilization and progress are largely matters of vigorous health. Scientists are coming more and more to the view that a leading cause of the downfall of certain once outstanding nations was a decline in general health. They attribute the degeneration of the ancient Greeks and Romans largely to malaria, which produced insufficient vitality. And in this connection they point to the conditions in some parts of Europe. Lack of food and the prevalence of unsanitary conditions produced widespread debility, with resulting loss of vigor, self-control and balance, especially in Russia. In this country, the climate is rigorous. It is true, but such climates produce bodily and mental vigor.—Western Home Monthly.

The British Empire, as a whole, has hardly begun to be developed.

Get Rid Of The Cough That Sticks

Some colds and coughs seem hard to shake off; stick right to you in spite of everything you do to get rid of them, but cannot.

These are the kind that are dangerous; the kind that make the lungs the kind that allow serious lung troubles to get a foothold in your system.

On the first appearance of a cough or cold you should procure a bottle of Dr. Wood's Norway Pine Syrup

and you will find that after taking a few doses your cough or cold will have disappeared.

This preparation has been on the market for the past 37 years, so when you buy it you are not experimenting with some new and untried remedy, but see that you get "Dr. Wood's" when you ask for it.

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Provincial Weekly News Bulletin

Research Work in T. B.

Alberta livestock breeders will be interested in the announcement at the annual dinner of the livestock breeders and exhibitors of Canada in Toronto last week, and appearing in western dispatches, that a famous French doctor, an associate of the Frenchman who has claimed the discovery of a vaccine for the prevention of tuberculosis in cattle, was coming to Canada to associate himself with research work and experiments now being carried on here with this vaccine. The announcement was made by Dr. H. J. Cody, chairman of the board of governors of the University of Toronto, where experiments with this vaccine are now being made. Dr. Cody states that the investigator from France will be associated with Dr. Fitzgerald in the Connaught anti-toxin laboratories at Toronto. It is understood that McGill university at Montreal is bringing another expert from France in the same connection. Experiments with the famous Calmett culture from France have been proceeding in Alberta for some months under the direction of the provincial department of agriculture and the university of Alberta. In the hope that something might be accomplished in the way of providing a preventative of tuberculosis in cattle, thus obviating the great economic waste in the destruction of valuable livestock under the present system of slaughter of cattle reacting to T.B. test.

Irrigation Colonization
The Lethbridge Northern Colonization

tion department had placed 138 new settlers on the project up to January 31, 1926, and had registered 377 home place farm units to a total of 53,262 irrigable acres, or an average farm unit of 141 irrigable acres, according to the annual report of the manager, James Pike, tabled in the legislature Monday afternoon.

Workmen's Compensation in Alberta
Figures from the 1925 report of the Workmen's Compensation Board of the province, which was tabled in the legislature on Monday, show that since the act became effective, on August 1, 1918, there has been paid as compensation to workmen a total of \$1,882,275.

In addition to this sum there has been not as yet paid for permanent disabilities and fatal accidents the sum of \$1,718,129, out of which \$554,275 has been paid for fatal accidents and on permanent disability cases.

The credit balance in this fund at the end of 1925 was \$1,369,390, out of which 162 widows and 340 children of deceased workmen, as well as 210 workmen permanently disabled, are receiving monthly payments.

British Settlers Coming
Seven hundred British settlers are due to arrive in Alberta in April, under the new immigration plan of the Imperial and Canadian governments.

Norwegians to Celebrate
Norwegians and descendants in Canada will hold a celebration at Camrose, Alberta, the coming summer, the dates being announced as July 3, 4, 5 and 6.

THE OCEAN END OF HUDSON'S BAY ROUTE

(By J. H. Hudson)

Quite the least problem in connection with the Hudson's Bay grain route is the building of the Hudson's Bay railway.

The real reason for delay in completing the railway is due to the ascertained facts, revealed by close examination of the whole situation. Facts that are of sufficient unpromising importance to deter any responsible government from proceeding with a project whose success depends entirely upon the railway's capability of bringing freight to a port from which reasonably safe and profitable shipping business may come.

It is not necessary for either bankers or railway executives to oppose the building of the Hudson's Bay railway, for if it were built, there would still remain the geographical, thermal and meteorological conditions which so effectively stand in the way of its becoming of economic value or usefulness as a grain route.

Let us examine some of these barriers which so decisively damn the whole proposition; For Churchill, a proposed terminal at tide water, is situated in an isolated and barren part of the world in the same latitude as Port Chipewyan which lies four hundred miles north of Edmonton. Hudson's Strait the entrance to Hudson's Bay, through which ships must pass to enter the bay, from the Atlantic Ocean, is about three hundred and fifty miles still further north, in the same latitude as Iceland, that part of Greenland which is two hundred miles north of Cape Farewell, the north shore of Great Slave Lake, and Dawson City, in the Yukon territory; all of which are within two hundred and fifty miles of the Arctic Circle; the same latitude that runs seven hundred and fifty miles north of the city of Edmonton.

Hudson's Strait is pretty far north. A voyage through it is in the nature of an Arctic expedition, and for many months in each year its waters are light sealed with ice.

A crop produced on the prairies cannot be marketed over this route during the year in which it is grown. Such a crop would have to be stored until the following month of June; until steamships could navigate to a port upon which many millions of dollars are yet to be spent before it is made available to ocean going steamers.

If shipowners could be induced to enter this trade at all, the ocean freight rates would necessarily be high, for long voyages in ballast would be necessary to reach Port Churchill. And so long as charters were available in more favorable situated ports, no ships could be prevailed upon to enter Hudson's Bay. The writer knows whereof he speaks, for he has had years of experience on the high seas, and suffered the inconvenience of rounding Cape Horn, which is, by no means a joyride, though there, there is plenty of sea room and the route is hundreds of miles further north of the Antarctic region than Hudson's Strait is south of the Arctic.

The nearest ports, of any importance to Ft. Churchill, are Halifax and Quebec, from either of which, to reach the proposed bay port, means a voyage of something over twenty-five hundred miles. A voyage that must be accomplished when gargantuan icebergs drift south—a menace to all shipping—in seas that are lashed to fury by gales that hurry southward to replace the expanded and risen air of the tropic and the summer heated north temperate zones; and also in seas where if mishap occurs there is little or no chance of timely succor from nearby vessels.

Governments have been strongly advised against the building of the Hudson's Bay railway, and in the light of full knowledge of the geographical, thermal, meteorological, and sea-faring difficulties, all of which are entirely due to Nature's architecture of the earth, and against whose designing it is futile, in this particular case, to even think of modifying.

There is no good reason why we should continue to hear of the Hudson's Bay railway as part of a grain route. There are mineral interests which it may serve. Unfortunately, the idea has captured the imagination of certain agriculturists. And one political party fosters the idea. The other party, knowing how people love to cling to a treasured belief, are diffident about uttering facts that would destroy a dear old Shibboleth that has neither real promise nor practical virtue.

New Honey Company

The Superior Honey Company is a new concern organized at Lethbridge, by R. C. Schurtz, a well known beekeeper of the north. Mr. Schurtz last year had a revenue of \$6,000 from the sale of bees, supplies and honey, and is one of the big honey producers.

Pay \$40,000 for Land
A colony of Hutterites in southern Alberta have purchased the farm of G. W. Mendenhall at Raymond, paying \$40,000 for 560 acres.

SWEDISH BAPTIST INSTITUTE NOTES

Our Institute course is drawing near its close for this year, and our great regret is that the time goes all too quickly. We feel that we have got a taste of the wonderful depths of the bible and we are hungering for more.

In our doctrinal studies Rev. Peterson is giving an exposition of bible books and preparation and delivery of gospel addresses. We also hope to have time for studies on the resurrection and judgments.

Rev. Larson is with us again and we are continuing studies on personal work and also on Young People's work.

Glen Campbell of New Norway, was obliged to return to his home last Friday. We hope to see him with us again soon.

Our matron, Miss Hawkes, left for Camrose Monday evening. We are looking forward to see her with us for some time.

Mrs. Rev. Larson, of Camrose, will spend a few days with us.

Boyce Vincent, a last year's student, arrived Tuesday morning. We are glad to have him with us again.

The Y. P. services on Sunday afternoons have been very impressive. Topics last Sunday — "Christ, the Word of God," "The Wisdom of God," and "Worship of God" dealt with by three of the students. Special singing and bible verse testimonies were also given.

For the special services at the close of the school we will have the pleasure of hearing Rev. Wm. Oberhart, and C. Burnett, of Calgary; A. C. Blingman, of Edmonton; and O. Johnson of Highland Park. Our teachers will also take part in the services. A cordial welcome is extended to all who are present.

"Come praying, come expecting..." (Con.)

EXCESSIVE ZEAL

Sometimes I visit Jimerack's store, and idly look the counters over, and see what I might see; and doubtless I'd behold some things, some cork screws, fans or wedding rings, that would appeal to me. I like to see what merchants have, the fountain pens and cans of salve, and demijohns and lamps; and if I'm let alone to gaze at all the rich and rare displays, I'm sure to blow some stamps.

But Jimerack, in his zeal to sell a posthole or Artesian well, or pump or liver pad, comes up and paws me with his hand, and heaves a greasy smut and bland, and makes me sore and sad. He strives to lead me there and here, to sell me jugs of kickless beer, and doodads, strange and weird; he fawn would lead me from and to, and sell me tubes of liquid glue, and lotions for the beard. I might have spent a silver before he had let me loaf about his neatly stored wares, the man offends me by his zeal, and so I do not blow a wheel, a kopeck or a molder. The motor dealer has new bolts, well worth a caller's smile and glances, and gladly would I stand, admiring paint and zinc and glass and fenders, truly grand. But as a prospect I am marked, and all around me there are parked nine salesmen and a half; they hand me language by the ton until I gnash my teeth and run — I cannot stand the goff. I wonder why the merchant prince won't let me look at fig and quince or jar of stringless peas, but he must back me to the wall and seize my buttonhole and hawl the merits of his cheese. Methinks it would be wise gadzook, to let a caller loaf and look, and rubber at his ease, and not insist that he shall buy a codfish or a custard pie, or antidote for fleas.—Walt Mason.

Canada's army alone in the great war was as large as the whole of Napoleon's gigantic grand army with which he invaded Russia.

ANNUAL MEETING M.D. OF BIGSTONE

The annual meeting of the Municipal District of Bigstone, 450, was held in the Lone Ridge hall on Saturday, February 20, at one o'clock, with a good attendance. All members of the old council were present except Coun. Burleigh.

Most of the time of the meeting was taken up in discussing the financial statement for 1925, which was read and explained by Secretary Treasurer Ratnay. Many questions were asked regarding the council's agreement with the Wetaskiwin hospital, but a full explanation of this appeared to satisfy all present.

Considerable criticism was voiced in regard to the tendency of some councillors to overspend the money allotted to their divisions and it was evidently the feeling of the meeting that they should be prevented from doing this. In the discussion Coun. Arnold stated that his division (5), had over \$600 to its credit.

The question of weed control was taken up and it was moved by Rickard and Johnson "That the council be requested to appoint a weed inspector." Carried unanimously.

Considerable argument developed upon the method of destroying gophers, it being contended by many that the distribution of poison was the wrong method. It was moved by Hengphill and Roop "That the council be requested to put a bounty on gophers tails instead of distributing poison." Carried unanimously.

The following names were then placed in nomination for the office of councillors:

Division 1—Carl Hanson and A. Irt Harris.
Division 4—Henry Krause elected by acclamation.

Division 5—Herman Arnold, August Johnson and R. P. Roop.

The voting for councillors will take place on Saturday, February 27th, at the following places:

Division 1—The Pinn Hall.
Division 5—West Liberty School.

ENGLISH FAMILIES
MAKING GOOD LIVING

A settler at Donalds, Alberta, in a letter to friends in the Old Country, writes as follows: "Canada is a great land of promise to families who will come and work on the land; it is fertile, healthy and beautiful. Other nations are realizing the resources of this land, as is evidenced by the numerous Swedish, Danish and Norwegian settlers in this area. There are two English families in Donalds now getting a good living, and each year paying off the loan for land, who came from engineering work in the United States a few years ago. They had no experience of hard work and are making good."—Western News.

The British Empire lost over 8,000,000 tons of shipping in the great war.
